## Oil Pumps MP & FP Series

Double helical screw type oil pumps

The MYCOM oil pump is a high performance pump series based on screw compressor manufacturing technology developed over many years. Trusted for its high reliability, over 38,000 MYCOM oil pumps had been installed worldwide. Even under severe conditions such as high pressure, the MYCOM oil pump can operate stably for long periods of time.

### Flange Type FP SERIES

FP Series are flanged type oil pumps, available to mount C-flange type motor. They are suitable for screw compressor lubrication systems.

### SPECIAL FEATURES

- 50P and 60P are available
- High efficiency performance
- Usable wide speed range from 950rpm to 1750rpm
- Industry proven durability with no thrust load screw gear structure
- Low noise, low vibration
- With integral pressure-regulating valve which creates an uncomplicated lube system (the relief valve can cover up to 50% of the total flow)
- Pressure range (0~2.2MPa) are applicable
- Reverse rotation and reverse flow direction is available upon request
- High temperature is available up to 248°F
- JIS 20K flange type

## Open Type MP SERIES

MP Series are gear mesh type which employ a screw rotor design. They are suitable for screw compressor lubrication systems.

## SPECIAL FEATURES

- Wide Flow capacity range are available
- High efficiency performance
- Usable wide speed range from 720rpm to 1750rpm
- Industry proven durability with no thrust load screw gear structure
- Low noise, low vibration
- With integral pressure-regulating valve which creates an uncomplicated lube system (the relief valve covers up to 50% of the total flow)
- Reverse rotation and reverse flow direction is available upon request
- Wide pressure range are applicable
- High temperature is available up to 266 °F (with White metal bearing and FKM O-ring)
- JIS20K is available
- ANSI flange type is available as 300#
- Several gases (Refrigerants) application are applicable
