

Kelvion

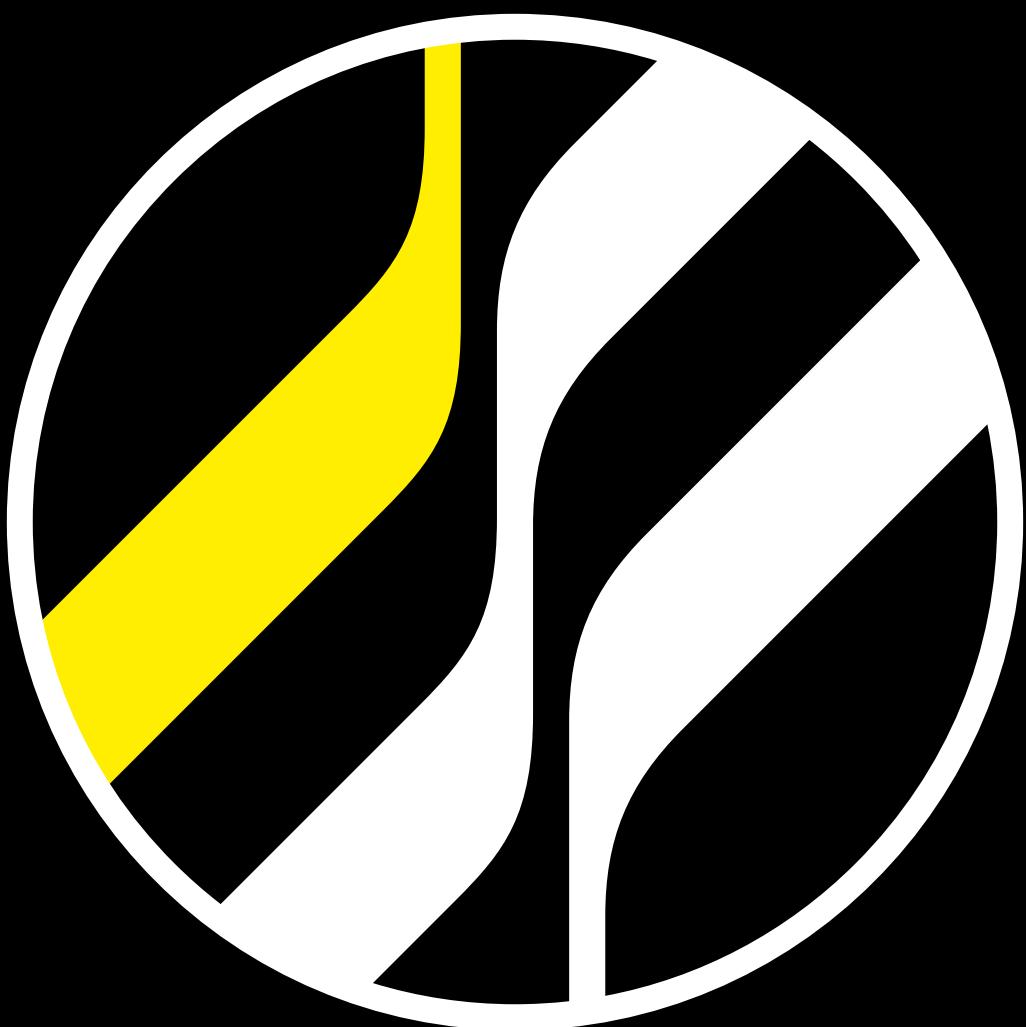

Küba Green Line Aircoolers

Küba market SP

# THE STANDARD FOR BASIC REFRIGERATION APPLICATIONS

# WE ARE KELVION – THE NEW BRAND IN HEAT EXCHANGE

GEA Heat Exchangers has changed: another new standalone company has been created out of the former Heat Exchanger Division of the GEA Group AG. The name Kelvion is new, but we continue as global experts in heat exchange. As always, we remain committed to earning your trust.

You'll still recognize us. We continue to develop our products, manufacture them with precision and distribute globally. We continue to offer one of the world's largest heat exchanger product portfolios: Plate heat exchangers, shell & tube heat exchangers, finned tube heat exchangers, modular cooling towers and refrigeration heat exchangers for a wide range of applications.

We operate in global markets for power generation, oil and gas, chemistry, marine applications, climate and environment, and food and beverages. From us, you can expect products with outstanding levels of efficiency, safety, and sustainability. More importantly, we care about your business, like close, trusted partners.

Customers rely on us to understand their needs, boost their performance, and deliver products that always get the job done. We compete for the toughest deals, in the harshest environments. But we're not too big to care. We're Kelvion – ready to take on the challenges of heat exchange. [www.kelvion.com](http://www.kelvion.com)

**Experts in Heat Exchange.**

Küba market SP

# THE STANDARD FOR BASIC REFRIGERATION APPLICATIONS

## Capacity range (for SC2)

0.9 kW         46 kW

## Temperature range ( $t_{L1}$ )

-25°C         +20°C

## Type Designation Code

1	2	3	4	5	6	7	
SP	A	E	35	-	F	2	3

- 1 Model range designation
- 2 Fin spacing
- 3 Electric defrost
- 4 Fan diameter

- 5 Refrigerant
- 6 Number of rows deep
- 7 Number of fans

Refrigerant (Box 5)

- F HFC / CO<sub>2</sub>
- G Glycol

Küba market SP

# APPLICATION BENEFITS FOR CONTRACTORS AND OPERATORS

## Application examples

- ▶ Cooling of packaged goods
- ▶ Commercial refrigeration with low traffic
- ▶ Supermarkets
- ▶ Basic cooling applications

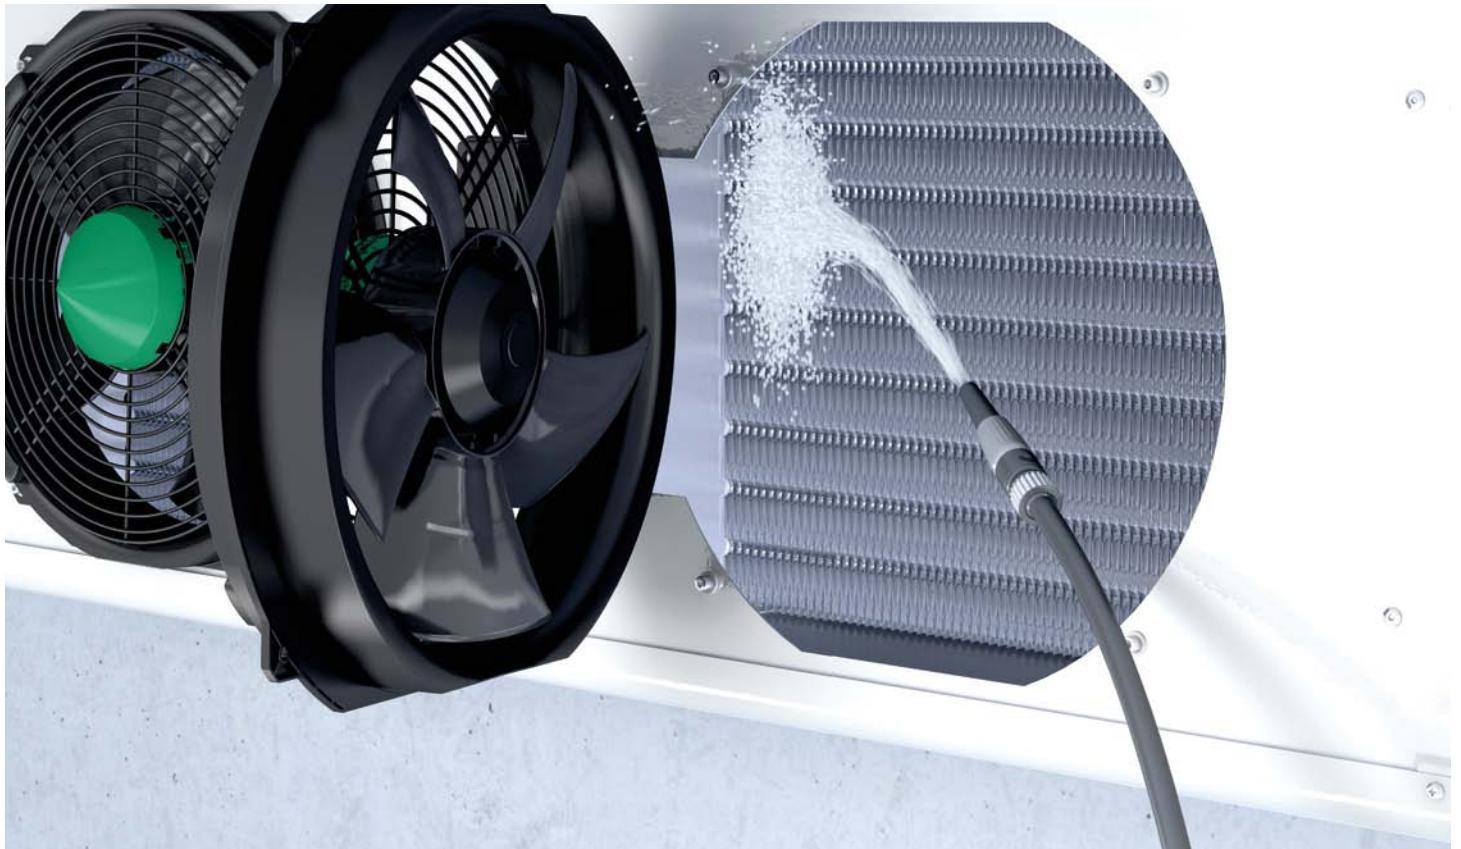

## KÜBA MARKET SP: MAXIMUM ENERGY EFFICIENCY.

The energy balance of a refrigeration system is the all-deciding factor. We have thoroughly reworked the Küba market SP as a complete system and have optimized the interaction among the individual components. Energy efficiency has been significantly enhanced.

Kelvion constantly works towards product improvements that reduce output, increase efficiency and reliability, while meeting increasingly strict legal regulations. (ErP Directive)

Kelvion in this way sustainably counters constantly rising operating costs, while also consistently meeting increasingly stringent legislative requirements (e.g. ErP 2015).

- ▶ Maximum energy efficiency with reduced current consumption and a great overall system performance.
- ▶ Performance-optimized heat exchanger, with the best fan system available.
- ▶ Innovative hygienic design ensures cleaning of the heat exchanger and fan.
- ▶ High-grade powder coating and use of composite-fiber materials minimize the corrodibility
- ▶ Large connection areas to the side help to ensure accessibility during maintenance or installation

## ENERGY EFFICIENCY

- ▶ The heart of the SP is the HFE fin-tube system. The thermodynamic and fluid-dynamic optimization of the air coolers – along with the effectively inter-coordinated operational modes in the refrigeration plant – enhances the energy efficiency of the refrigeration process.
- ▶ This system assures fast and energy-efficient defrosting after a long refrigeration cycle.
- ▶ The fan motors and propellers are optimally designed by means of a full bellmouth with aerodynamic design. All SP units utilize AC or EC technology fan systems.

## SIMPLE INSTALLATION

- ▶ The trusted and robust casework is ideal for easy mounting. The round corners and the smooth edges of the casing parts mean no danger of injury for installation and cleaning staff.
- ▶ The integrated terminal box for electrical wiring of the fans (except SP 23) together with spring-loaded terminals enable fast and sure connections.
- ▶ Generously dimensioned connection area to the side gives access for refrigerant tubing, or installation of the expansion valve.

## WITHOUT A DOUBT HYGIENIC

- ▶ The hinged fan system (except SP 23) makes thorough cleaning of the heat exchanger and the fan very easy.
- ▶ The casing has smooth, powder-coated surfaces that are easy to clean, food-safe, and environmentally friendly.
- ▶ The fan system offers an additional water-spray protection. This provides reliable protection for the fan assembly and enables intensive cleaning. Motor rating IP54 (EC). All standard AC fan units have an IP44 enclosure.

Küba market SP

# BASIC VERSION

## CASING

- ▶ Aluminum, Sendzimir zinc-plated steel
- ▶ Best quality powder coated edges thanks to high-grade powder coating, RAL 9010 pure white
- ▶ Food-safe
- ▶ Smooth surfaces: Easy to clean
- ▶ Removable drip tray (hinged via Mounting Kit)
- ▶ Removable side panels
- ▶ Drip tray: additional integrated splash pan
- ▶ 3° inclined fan plate

## ELECTRIC DEFROST

- ▶ Tubular heater: Stainless steel
- ▶ Connections: steam-proof
- ▶ Mains voltage: 1/N/PE 230V 50/60Hz
- ▶ Readily wired for connection box
- ▶ Optimized tubular heater configurations ensure fast and even defrosting
- ▶ Aluminum tube sleeves: Ensure excellent heat transfer to the fins and thus effective defrosting cycles with optimized service life

## HEAT EXCHANGER

- ▶ Tube: Copper, inner finned, Ø 12 mm
- ▶ Fins: Aluminum HFE® fins
- ▶ End plates: Aluminum
- ▶ Staggered tube system
- ▶ Fin spacing:  
A = 4.0 mm  
B = 7.0 mm
- ▶ Fins flared to form-fit the core tube
- ▶ Internal cleanliness according to DIN 14276
- ▶ Connection Inlet:  
SPA/B 23-21,31,32 / 30-21,31: Single injection via copper pipe for solder connection, sealed
- ▶ SPA/B: Venturi distributor with multiple injection
- ▶ Connection Outlet:  
Copper pipe for solder connection with schrader valve UNF 7/16“, sealed

## FAN UNIT

- ▶ AC technology
- ▶ Draw-through axial fan
- ▶ Fan diameter: 230 (ESM Motor), 300, 350, 450 mm
- ▶ Permissible motor ambient temperatures (50 Hz)  
SP23: -30°C up to +50°C | SP30: -40°C up to +50°C  
SP35: -40°C up to +55°C | SP45: -40°C up to +50°C  
SP45-51 to 74: -40°C up to +45°C
- ▶ Supply voltage: 1/N/PE 230V 50/60Hz
- ▶ Motor protection: Built-in thermal contact (inaccessible)
- ▶ SP45-51 bis 74: Built-in thermal contact (accessible)
- ▶ Protection class: SP23: IP 54 | SP30-45: IP 44
- ▶ Insulation class:
- ▶ SP23: B | SP30: B | SP35: F | SP45: F | SP45-51 to 74: F
- ▶ Fans hinged (except SP23)
- ▶ Fan blade, wallring and mounted parts are made of fiber-reinforced composite material
- ▶ Condensate drain grooves integrated in the wall ring
- ▶ Wall ring ready for an integrated wall ring heating (Accessory) from Ø 300mm
- ▶ Motor Control: **SP 23**   **SP 30,35,45**

The dimensions are only valid for the standard model design!  
Note the differences in dimension among versions and accessories.

# DIMENSIONAL DRAWINGS

## Küba market SP

# VARIANTS

## MOTOR - VARIANTS

### V 1.50 EC FANS WITH FIXED SPEEDS

SP 23: ESM motor with two speeds (standard)  
from SP 30: EC motor with fixed speed

### V 1.52 EC FAN WITH CONTROLLABLE SPEED

Controllable fan, 0 ... 10 V, for Ø 300, 350, and 450 mm

## PROTECTION AGAINST CORROSION

### V 6.01 CORROSION PROTECTION 1

Tubing: Copper  
Fins: Aluminum, epoxy-resin-coated  
End plates: Aluminum protective coating  
Casing: Aluminum/zinc coated steel,  
protective coating on both sides

### V 6.04 CORROSION PROTECTION 4

Tubing: Copper  
Fins: Aluminum, epoxy-resin-coated  
End plates: Aluminum  
Casing: Aluminum/zinc coated steel,  
protective coating on one side

## CASING - VARIANTS

### V 3.09 DOUBLE-WALLED, INSULATED DRIP TRAY

Prevents condensed water from forming on the bottom side of the pan, and it reduces the transfer of defrost heat into the cold rooms.

The following dimensions are changed:

Width B: +60 mm

Height H: +30 mm

Depth T: +30 mm

## DEFROST - VARIANTS

### V 4.01 HOT-GAS COIL IN THE DRIP TRAY (CU)

Hot-gas connection on both sides; copper

### V 6.05 HOT GAS IN HEAT EXCHANGER

Hot gas circuit for coil, without  
non-return valve

## CO<sub>2</sub> - VARIANTS

### V 7.45 CO<sub>2</sub>- DIRECT EXPANSION

up to 45 bar operating pressure

### V 7.60 CO<sub>2</sub>- DIRECT EXPANSION

up to 60 bar operating pressure

# ACCESSORIES

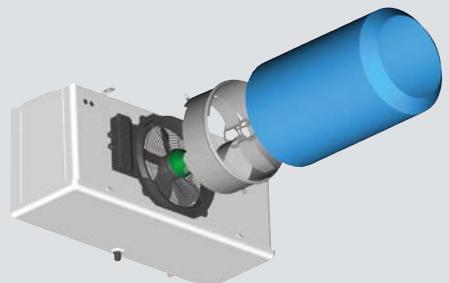

## SHUT-UP® (+ADAPTER)

The Shut-Up® optimises the defrosting procedure, especially in deep-freeze applications.

Shut-Up® is suspended over the fan unit, closing the Air Cooler. Hot air cannot escape.

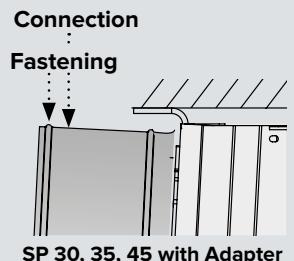

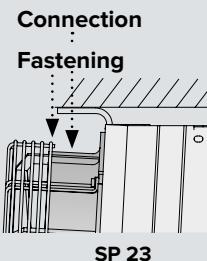

### Construction:

High-tech microfiber, tearproof, UV-resistant, form- and temperature resistant, rot-proof, food-safe, washable at 30°C, chemical purification P

### Selection table & Dimensions:

Type	Küba market SP			Küba Shut-Up®	
	Fan blade Ø mm	Connections Ø mm	Fixture Ø mm	Air outlet Ø mm	Length mm
SP 23	230	253	258	149	390
SP 30	300	360	369	254	490
SP 35	350	427	436	344	610
SP 45	450	558	567	430	684

### NOTE:

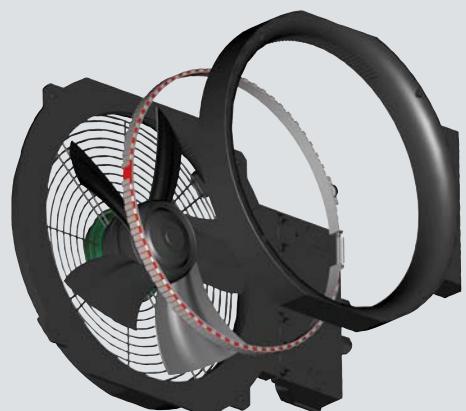

Due to the additional external pressure, the air quantity and Air Cooler capacity change: With using Shut-Up®: Air volume reduces by 10% (-5% cooling capacity)  
1 Shut-Up® per fan unit required. Delivery not mounted. For SP 23, you do not need an additional to install a Shut-Up®.

## WALL RING HEATING WH

The wall ring heating prevents formation of ice between fan blade and the wall ring.

### Construction:

- Maximum energy efficiency, optimal control behavior, and reduced output (up to 87 % less).
- Heat retention in the wall ring, no steam formation, no overheating.
- Protection from contact by completely integrating the heating element.

### Selection table & Technical data:

Type	Description	Current		Capacity
		A	W	
SP 23	not available			
SP 30	WH 30	0.5		118
SP 35	WH 35	0.9		209
SP 45	WH 45	1.2		266

### NOTE:

Küba wall ring heating WH is only available for SP 30, SP 35, SP 45. 1 wall ring heating WH per fan unit required.

# FINNED-TUBE HEATERS SPHR/SPHRZ

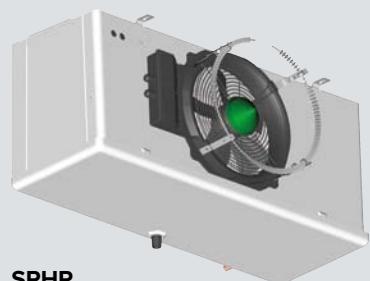

For air coolers with draw-through fans.

For conditioning of room air.

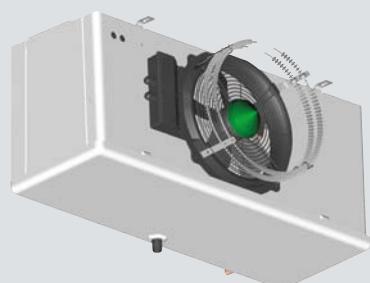

- ▶ SPHR = Standard design
- ▶ SPHRZ = Additional heater
- ▶ SPHR + SPHRZ = Greater heating capacity

**Selection table, Technical data & Dimensions:**

Type	Description	Current				Capacity			
		L1 A	L2 A	L3 A	Total A	L1 kW	L2 kW	L3 kW	Total kW
<b>SP 23</b>	SPHR 23	4.3	-	-	4.3	1.0	-	-	1.0

**Dimensions:**

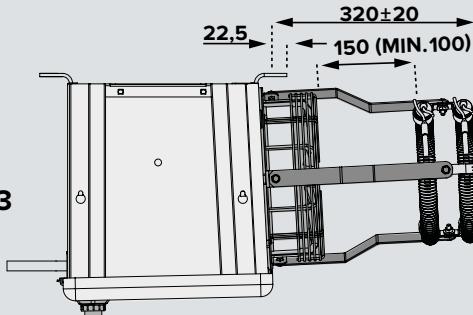

**SPHR FOR SP 23**

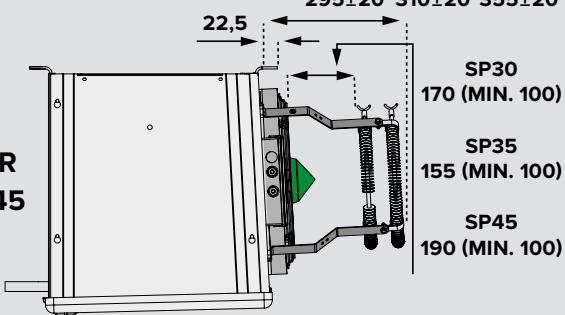

**SPHR FOR SP 30,35,45**

**SPHRZ FOR SP 23**

**SPHRZ FOR SP 30,35,45**

**NOTE:**

This unit is operated only when the air-cooler fans are in use, to prevent overheating of the ceiling of the cold room.  
Be sure to observe the relevant safety instructions. 1 SPHR/Z per fan unit required.

# AIR HOSES (MUST BE PROVIDED ON SITE)

Ventilation can be optimised with textile / PVC air hoses.

- ▶ Applications in work rooms and production areas
- ▶ Cooled goods that are sensitive to draft (i.e. flowers, ripening cheeses)

## Advantages:

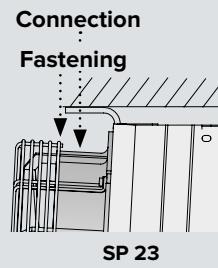

The air hoses make uniform air distribution possible at very low air speeds.

- ▶ Working in a draft-free environment yields low illness rates
- ▶ Maximum protection for sensitive cooled goods
- ▶ No condensation water: temperatures do not fall below the dew point because air can penetrate the woven material
