

SABROE SMC reciprocating compressor units

Large single-stage compressors with swept volumes of 200–1350 m³/h

SMC compressor units are ideal for use in medium-sized refrigeration installations where reliable service is a major priority. They are particularly effective under part-load conditions.

SABROE SMC compressors are world-renowned for their exceptional reliability, making them an economical, low-maintenance solution for heavy-duty refrigeration, using all common refrigerants.

Range

Fifteen different models are available to provide swept volumes of between 226 and 1357 m³/h.

SMC 116 single-beam reciprocating compressor unit with Unisab III systems controller

Advantages

Benefits

High coefficient of performance (COP), with excellent performance under part-load conditions

Low power consumption, which greatly reduces operating costs

Variable-speed drive provides stepless capacity control over the entire operating range

Power consumption and operating costs kept to a minimum

Condition-based service intervals embedded in the controls equipment

Minimum downtime and low service costs due to extremely long service intervals

Easy to access for service, with limited spare parts requirements

Easy, inexpensive maintenance, which helps limit downtime and reduce operating costs

Optional special oil separator design based on coalescer technology

Low oil carry-over, which cuts back on oil costs

Configured without oil system

Small footprint and easy service access

Options

- Unisab III systems controller
- Variable-speed drive line (Unisab always included)
- Oil separator for low oil carry-over
- Gauges, thermometers and temperature/pressure control switches
- Extended cylinder capacity control
- Oil level regulator (for use in parallel systems)
- ATEX-compliant configuration
- Special vibration dampening.

* Other refrigerants available on request

Nominal capacities are based on:
1500 rpm at 50 Hz.
1800 rpm at 60 Hz or VSD.

For R717

2 K liquid subcooling and 0.5 K non-usable suction superheat.

Design pressure, HP side: 28 bar
Design pressure, LP side: 18 bar
Differential pressure: 25 bar.

Sound pressure levels in free field, over reflecting plane and one metre distance from the compressor block.

Min./max. speed	R717
SMC S-series	500-1800 rpm
SMC L-series	500-1800 rpm
SMC E-series	500-1500 rpm
