RC6 series: 3 models with 4, 6 or 8 cylinders

The RC6 series consists of 3 single-stage reciprocating compressors with 4, 6 or 8 cylinders. The type designations are RC46, RC66 and RC86 respectively.

All models can also be used as (low-pressure) booster compressors.

Apart from differences in size of compressor crankcases and crankshafts, as well as in number of cylinders, all three types are identical as far as spare parts and construction are concerned.
