

ELFOEnergy Compact

WSAN-EE WSAT-EE

Heat pump, optimised for cooling, suitable for systems with radiant panels and water terminal units.

WSAN-EE WSAT-EE

17÷151

Water chiller

- WSAN-EE: reversible heat pump
- WSAT-EE: cooling only

Air cooled
Outdoor installation

Capacity from 5,07 to 37,4 kW

ELFO ENERGY COMPACT

ELFOEnergy COMPACT water cooling units use R-410A refrigerant. Because they are so compact, they are **ideal for residential applications**. And they **keep on working** under all conditions thanks to a variable speed fan and water pump.

The series guarantees:

- **silent operation** thanks to a fan unit that operates at only 70% of its maximum speed under normal conditions;
- **storage-free operation** and **temperature modulation** for a perfect balance between output power and energy consumption.

available configurations

WSAN-EE	17	(1)	(2)	(3)	(4)	(5)	(6)
S	230M	CCS	HYGU	-	-		

(1) LOW TEMPERATURE:

- - Not required (Standard)
- **B** Low water temperature (sizes 61÷151)
This version allows unit operation within the water and glycol mixing temperature range between +5°C and -8°C inclusive.

(2) SUPPLY VOLTAGE:

- **230M** 230/1/50 (Standard for sizes 17÷31)
- **400TN** 400/3/50+N (Standard and only for sizes 41÷151)

(3) CONDENSER COIL:

- **CCS** Standard condenser coil
- **CCCA** Condenser coil in copper/aluminium with acrylic coating
- **CCCA1** Condenser coil in copper/aluminium with Energy Guard DCC Aluminium treatment
- **CCCC** Condenser coil in copper/copper

(4) HYDRONIC GROUP:

- **HYGU** Hydronic group user side (Standard)
- - Not required

(5) SOFT STARTER:

- - Not required (Standard)
- **SFSTR1** Device for inrush current reduction for 230/1/50 units (sizes 17÷51)
- **SFSTR4N** Device for inrush current reduction for 400/3/50+N units (sizes 61÷151)

(6) ADDITIONAL CARDS:

- - Not required (Standard)
- **KDT3V** Double temperature control kit, set point compensation 4-20 mA, 3-way valve control

Data referred to the following conditions:

- (1) A7/W35 internal exchanger water 30/35°C; external air temperature 7°C D.B./ 6°C W.B.
A2/W35 internal exchanger water 30/35°C; external air temperature 2°C D.B./ 1,1°C W.B.
A5/W35 internal exchanger water 30/35°C; external air temperature -5°C D.B./ -5,4°C W.B.
A7/W45 internal exchanger water 40/45°C; external air temperature 7°C D.B./ 6°C W.B.
A2/W45 internal exchanger water 40/45°C; external air temperature 2°C D.B./ 1,1°C W.B.
A5/W45 internal exchanger water 40/45°C; external air temperature -5°C D.B./ -5,4°C W.B.
A35/W18 internal exchanger water 23/18°C; external air temperature 35°C
A35/W7 internal exchanger water 12/7°C; external air temperature 35°C
- (2) The total power input is the total power absorbed by the compressors + fans - the power absorbed by the fan to supply the remaining available static pressure to the system + the power absorbed by the auxiliary circuit
- (3) EUROVENT COP: coefficient of performance in heating mode. Relationship between heating capacity output and power input according to EUROVENT. The power input is the total power absorbed by the compressor + fan + auxiliary circuit + defrost cycles.
- (4) COP (EN 14511:2008) coefficient of performance in heating mode. Relationship between heating capacity

output and power input according to standard EN 14511:2008. The power input is the total power absorbed by the compressor + fan + auxiliary circuit + defrost cycles + part of the pump to overcome internal pressure drops.

(5) EUROVENT EER calculated as the relationship between the cooling capacity and the total power input.

(6) ESEER coefficient of seasonal performance in cooling mode calculated according to Eurovent. Outlet water 7°C.

(7) Water flow and available static pressure in winter operating conditions A7/W35: water at the internal heat exchanger 30/35°C; outdoor air temperature 7°C D.B. / 6°C W.B.

(8) Sound levels refer to units with full load under nominal test conditions. The sound pressure is measured at 10 m from the external surface of the unit in open field conditions.

functions and features

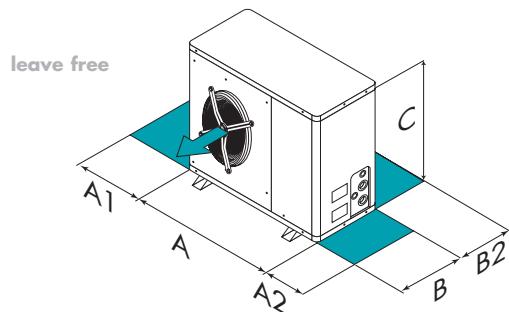

accessories

- ▶ Rubber antivibration mounts
- ▶ Serial communication module to supervisor (MODBUS)
- ▶ Phase monitor
- ▶ Double temperature control kit, set point compensation 4-20 mA, 3-way valve
- ▶ Set point compensation with according to outdoor enthalpy
- ▶ Service keypad (cable from 1,5 metres)

Key to symbols:

- Accessories supplied separately.

dimensions and clearances

CAUTION! For trouble-free operation of the unit it is essential to maintain the clearances in green.
