Water Chiller

Plug-in water chillers.
Cooling capacity from 2 to 70 kW

Competence and experience in industrial cooling systems

VWK water chiller

Standard equipment:

- Water control
- Stainless steel frame
- Stainless steel coil evaporator
- Chiller IP 54
- Operating temp. 37° C max. ambient
- High tech scroll compressor / low noise
- High efficiency air cooled condenser
- Digital thermostat hysteresis +/- 1,0 K
- Refrigerant circuit with TÜV approved low and high pressure switch
- By-Pass valve
- Draining through water level control
- All systems with control transformer. no neutral required
- Environment friendly refrigerant R407C
- CH-pump with carbide / carbide shaft seal
- Panels in RAL colour on request

Options:

- DC voltage - control circuit
- Drain valve for tank
- Water outlet manometer
- Water level switch for pump-protection
- Winter start up regulation (0-50-100%)
- Common alarm (potential free)
- Special voltage
- Flow switch
- Common alarm (potential free)
- Water set point +40° C max.
- Hand shut off valve between tank and pump
- Wire labelling
- Harting connectors / plugs
- Refrigerant R 134 A
- Non return valve + magnetic valve
- Hysteresis +/- 0,3 K
- Air filter
- Stop process with low/high temperature alarm
- CR-pump for pressure above 3 bar with carbide / carbide shaft seal
- Stainless steel piping
- Operating temperature > 37° C ambient

Basket evaporator

All standard machines are specified for a maximum ambient temperature of + 37° C.

*) Machines for + 42° C maximum ambient temperature are available at extra cost. Machine sizes will not change.
