

AIR BLUE

a i r c o n d i t i o n i n g

## Cool Design for Homes and Offices

### Homes

Easy to install and use, quiet, attractive, and designed to fit any space: there are a lot of reasons why Air Blue air conditioners have always been a reliable solutions for homes of any size.

### Offices

Air Blue has great experience in cooling high-tech rooms whose temperature and humidity levels require constant monitoring. Installed in EDP and telecommunication centers, Dat'Air air conditioning systems ensure the correct functioning of the most advanced technological equipment by stabilizing the climatic factors within the environment.

ISO 9002 Certified Quality System.

## SECTION INDEX

---

### *Air/water chillers*

<b>134</b> FREEZY	5 ÷ 15 kW	Water chillers and air/water heat pumps with axial fans, scroll compressors, storage tank and water pump, evaporator of the coaxial type.
<b>138</b> ALFA	4,6 ÷ 49,8 kW	Water chillers and air/water heat pumps with axial fans and scroll compressors
<b>142</b> ALFA ST FC		Air-condensing liquid chillers with axial fans and free-cooling coil
<b>146</b> ALFA CF	4,6 ÷ 49,8 kW	Water chillers and air/water heat pumps with centrifugal fans and scroll compressors.

### *Air-cooled condensing units*

<b>152</b> ALFA/LE	5,6 ÷ 64,6 kW	Condensing units and heat pumps with axial fans and scroll compressors
<b>156</b> ALFA CF/LE	5,6 ÷ 64,6 kW	Condensing units and heat pumps with centrifugal fans and scroll compressors.

### *Water/water chillers*

<b>160</b> MU	5,1 ÷ 42,7 kW	Water chillers and water/water heat pumps with scroll compressors.
---------------	---------------	--

### *Water-cooled condensing units*

<b>164</b> MU/LE	6,3 ÷ 51,6 kW	Condensing units and heat pumps with scroll compressors.
------------------	---------------	--

### *Condenserless units*

<b>168</b> MU/LC	4,5 ÷ 37,6 kW	Condenserless units and heat pumps with scroll compressors
------------------	---------------	--

### *Fan units*

<b>172</b> UTA-UTAH	6 ÷ 49,3 kW	Concealed direct expansion fan unit.
<b>174</b> UTW	5,8 ÷ 49,1 kW	Concealed chilled water fan unit

### *Fan units*

<b>180</b> MINIDAT	6 ÷ 9 kW	Low power air conditioners with vertical duct.
<b>196</b> CONSOLE	11 ÷ 20 kW	Low and medium power air conditioners with horizontal duct.
<b>212</b> MODULAR	11 ÷ 118 kW	Medium and high power air conditioners with vertical duct, single compressor.
<b>230</b> BIGDAT	26 ÷ 104 kW	Medium and high power air conditioners with vertical duct, two compressors.

### *Air-cooled condensers*

<b>244</b> CRCF		Remote air-cooled condensers with centrifugal fans.
<b>250</b> CRAX		Remote air-cooled condensers with axial fans.
<b>254</b> RAC		Remote water chillers with axial fans.

Prices are in Euro. V.A.T. not included.

**Air/Water chillers and heat pumps with axial fans, scroll compressors, storage tank and water pump, evaporator of the coaxial type.**

## GENERAL DESCRIPTION

### Unit Frame.

Galvanized steel frame with 180° baked-on epoxy-polyester powder paint for maximum weather resistance even in marine environments. RAL 7032 colour paint.

### Compressor.

Lownoise, scroll type compressor with thermal overload cutout included in motor windings and rubber vibration-damping supports. The three-phase models are equipped with a safety device (phase sequence relay), that prevents reverse compressor rotation, and a crankcase heater.

### Condenser.

Copper tube coils with aluminium fins. The finned coil pack is protected by a galvanized metal guard.

### Fans.

Axial fans directly coupled to 6-pole single-phase motor, IP 54 fan protection grading. Fitted with accident-prevention guard.

### Evaporator.

Of the coaxial type, immersed in storage tank with anti-condensate insulation consisting of closed-cell foam material, chilled water pump and flow switch.

### Refrigerant circuit.

With charging connection, drier filter, liquid sight glass (on models 410-610-810 only), thermostatic valve, melting plug.

### Electrical panel.

The panel includes:

- main switch (on models 410-610-810 only);
- compressor and control circuit protections;
- compressor contactor;
- 230÷24 V transformer.

### Microprocessor.

It controls the following functions:

- water temperature control;
- anti-freeze protection;
- compressor operation timing;
- alarm reset;
- alarm buzzer;
- digital input for external ON/OFF signal
- potential contact for remote alarm signals.

Digital display of:

- inlet and outlet water temperature;
- temperature and differential settings;
- hour meter readouts of compressor and pump operation;
- alarm description;
- operating status indicator (summer/winter) - green LED;
- compressor status indicator - green LED.

### Other controls.

- manual-reset high pressure switch;
- automatic-reset low pressure switch;
- flow switch on evaporator water circuit.

### Testing.

The units are factory tested and come with anti-foaming synthetic oil and R 407C refrigerant.

## AVAILABLE VERSIONS

FREEZY/HP reversible heat pump. In addition to the basic version components, the unit also includes:

### Refrigerant circuit:

four-way diverting valve, liquid receiver, check valve, second thermostatic valve.

### Electrical panel:

- a microprocessor also controls the following functions: summer/winter changeover, automatic defrost.

## ACCESSORIES

- remote control terminal;
- card for RS485 serial line;
- rubber vibration dampers;
- special voltages: 400V/3pH/50Hz for models 210 to 360;
- fan speed control;
- coils with special treatments.

**Water chillers and air/water heat pumps  
with axial fans and scroll compressors.**

#### GENERAL DESCRIPTION

##### **Unit Frame.**

Galvanized steel frame with baked-on epoxy-polyester powder paint. RAL 7032 colour.

##### **Hermetic compressors.**

Scroll and reciprocating type (mod. 181-201) with thermal overload cutout, mounted on rubber vibration-dampers, installed in a technical compartment separated from the air flow.

##### **Refrigerant circuit.**

With charging connection, liquid sight glass (except 21-31-36), drier filter, thermostatic expansion valve, high and low pressure switches, safety devices.

##### **Evaporator.**

Braze-welded plate type with anti-condensate insulation, anti-freeze protection and mechanical flow switch.

##### **Condenser.**

With finned coils and galvanized metal protection guard.

##### **Axial fans.**

Directly coupled to single-phase, 6-pole motors with speed control and accident-prevention guard.

##### **Electrical panel.**

With main switch, power and control circuit protection, compressor contactor.

Microprocessor-controlled unit with function display mode.

##### **Testing.**

Units are factory tested and supplied with initial refrigerant and oil charge.

#### AVAILABLE VERSIONS

##### **ALFA**

Water chiller.

##### **ALFA/HP**

Heat pump equipped with four-way diverting valve, liquid receiver, second thermostatic expansion valve and suction line separator (mod. 181-201). Defrosting for summer/winter changeover.

##### **ALFA/ST**

Hydraulic circuit featuring insulated storage tank, water pump, safety valve and expansion vessel (for heat pump only).

#### ACCESSORIES

- no-frost electric heater on evaporator (for /ST, installed also in tank, pumps and pipes);
- desuperheater for 20% recovery of condensation heat (from 91 to 201);
- 100% condensation heat recovery condenser (from 91 to 201);
- rubber vibration dampers;
- coils with special treatments;
- special voltages;
- expansion vessel (standard on ALFA/ST/HP);
- automatic filling unit with gauge;
- additional heaters for ALFA/ST/HP units);
- remote control terminal;;
- card for RS 422 or RS 485 serial line.

AIR BLUE

## ALFA / ST / FC

### Air-condensed liquid chillers with axial fans and free-cooling coils.

#### GENERAL DESCRIPTION

##### **Unit Frame.**

Galvanized steel frame with baked-on epoxy-polyester powder paint. RAL 7032 colour.

##### **Hermetic compressors.**

Scroll type compressors with thermal overload cutout, mounted on rubber vibration dampers, installed in a technical compartment separated from the air flow.

##### **Refrigerant circuit.**

With charging connection, liquid sight glass, drier filter, thermostatic expansion valve, low ambient liquid back-up kit, high and low pressure switches, safety devices.

##### **Evaporator.**

Braze-welded plate type with anti-condensate insulation, anti-freeze protection and mechanical flow switch.

##### **Condenser.**

Of the finned-coil type, with copper tubes and aluminium fins.

##### **Axial fans.**

Directly coupled to single-phase, 6-pole motors, with accident-prevention guard. Free-cooling coils

charged with a water/glycol mixture and encased in an aluminium frame. Vent valves and discharge valves, galvanized metal protection guard.

##### **Hydraulic circuit.**

With insulated storage tank, water pump, safety valve, three-way valve for free-cooling.

##### **Electrical panel.**

With main switch, power and control circuit automatic breakers, pump motor overload cutout, compressor and pump contactors. Microprocessor-controlled unit with function display mode. Free-cooling logic.

##### **Testing.**

Units are factory tested and supplied with refrigerant and oil charge.

#### ACCESSORIES

- no frost kit (evaporator, storage tank, pumps and pipings);
- rubber vibration dampers;
- coils with special treatment;
- special voltages;
- expansion vessel;
- automatic filling unit with gauge;
- remote control terminal;
- card for RS 485 serial line.

**Water chillers and air/water heat pumps with centrifugal fans and scroll compressors**

#### GENERAL DESCRIPTION

##### **Unit Frame.**

Galvanized steel frame with baked-on epoxy-polyester powder paint. RAL 7032 colour.

##### **Hermetic compressors.**

Scroll and reciprocating type compressors (mod. 181-201) with thermal overload cutout, mounted on rubber vibration dampers and installed in a technical compartment separated from the air flow.

##### **Refrigerant circuit.**

With charging connection, liquid sight glass (except 21-31-36), drier filter, thermostatic expansion valve, high and low pressure switches, safety devices.

##### **Evaporator.**

Braze-welded plate type with anti-condensate insulation, anti-freeze protection and mechanical flow switch.

##### **Condenser.**

Of the finned-coil type, with galvanized metal protection guard.

##### **Centrifugal fans.**

Directly coupled to electric motors (from 21 to 81), with V-belt transmission and pulleys (from 91 to 201). Accident-prevention guard fitted on delivery outlet.

##### **Electrical panel.**

With main switch, power and control circuit automatic breakers, pump motor overload cutout, compressor and pump contactors. Microprocessor-controlled unit with function display mode.

##### **Testing.**

Units are factory tested and supplied with refrigerant fluid and oil charge.

#### AVAILABLE VERSIONS

##### **ALFA CF**

Water chiller.

##### **ALFA CF/HP**

Heat pump equipped with four-way diverting valve, liquid receiver, second thermostatic expansion valve and suction line separator (mod. 181-201). Defrosting for summer/winter changeover.

##### **ALFA CF/ST**

Hydraulic circuit featuring insulated storage tank, water pump, safety valve and expansion vessel (for heat pump only).

#### ACCESSORIES

- no-frost electric heater on evaporator (for /ST, installed also in tank, pumps and pipes);
- desuperheater for 20% recovery of condensation heat (from 91 to 201);
- 100% condensation heat recovery condenser (from 91 to 201);
- rubber vibration dampers;
- coils with special treatment;
- special voltages;
- expansion vessel (standard on ALFA CF/ST/HP);
- automatic filling unit with gauge;
- additional heaters (for ALFA CF/ST/HP units);
- increased available pressure;
- mufflers on air suction and discharge lines;
- low ambient kit with:
  - speed control (from 21 to 36),
  - air shutters (from 41 to 201),
- remote control terminal;
- card for RS 422 or RS 485 serial line.

**Condensing units and heat pumps with  
axial fans and scroll compressors**

#### GENERAL DESCRIPTION

##### **Unit Frame.**

Galvanized steel frame with baked-on epoxy-polyester powder paint. RAL 7032 colour.

##### **Hermetic compressors.**

Scroll and reciprocating type compressors (mod. 181-201) with thermal overload cutout, mounted on rubber vibration dampers and installed in a technical compartment separated from the air flow.

##### **Refrigerant circuit.**

With charging connection, liquid sight glass (except 21-31-36), drier filter, high and low pressure switches, safety device.

##### **Condenser.**

Of the finned-coil type, with galvanized metal protection guard.

##### **Ventilatori assiali.**

Directly coupled to single-phase, 6-pole motors, with accident-prevention guard.

##### **Electrical panel.**

With main switch, power and auxiliary circuit protection, compressor contactor.

##### **Testing.**

Units are factory tested and supplied with initial oil charge.

#### AVAILABLE VERSIONS

##### **ALFA/LE**

Condensing unit

##### **ALFA/LE/HP**

Reversible condensing unit equipped with four-way diverting valve, liquid receiver, second thermostatic expansion valve and suction line separator (mod. 181-201). Defrosting for summer/winter changeover.

#### ACCESSORIES

- solenoid valve on liquid line (except HP version);
- liquid receiver;
- expansion vessel for remote evaporator;
- fan speed control;
- rubber vibration dampers;
- coils with special treatment;
- special voltages.

**Can be used in combination with UTA - UTAH direct-expansion fan units**

(\*) Ambient air temperature 32 °C; dew temperature at suction pressure 7 °C.

(\*\*) Evaporator inlet air temperature DB 8 °C rel. hum. 75%; condenser inlet/outlet water temperature 40-45 °C.

(#) For heat pump units increase weight by 10%.
