TECHNICAL CHARACTERISTICS

ZETA ECHOS

Air cooled water chiller with hermetic scroll compressors and brazed plate evaporators. Basic unit outfit.

STRUCTURE

Self supporting frame and removable panels lined with noise-absorbent expanded polyurethane matting in galvanised steel sheet painted in RAL 5014 with polyester powder at 180 °C, to offer high weather resistance. Screws and bolts in Stainless Steel.

COMPRESSORS

Parallel connected hermetic rotary screw scroll type compressors with oil level gauge, klixon thermal protection and oil equalization system. Enclosed in an insulated compartment and separated from the air flow, the compressors are accessible through the special panels for maintenance operations, even when the unit is on.

CONDENSERS

The heat exchanger is composed of an alluminium-finned copper-tube multirow coil, of high efficiency.

The finned coil pack is protected by a metal mesh.

ELECTRO FANS

Axial fans designed to enhance performance and reduce noise emissions, driven directly by a 6-pole electric motor with integrated klixon thermal protection. Motor protection degree is IP 54. The fan is fitted with a protection grille in compliance with UNI EN 294.

EVAPORATOR

Plate type heat exchanger in AISI 316 stainless steel covered with closed-cell foam.

Each evaporator is equipped with temperature probe for antifreeze protection and vane operated flow switch supplied as standard. The plate heat exchangers provide for:

- Increased COP/EER;
- Reduced refrigerant charge;
- Reduced volume and weight of the unit;
- Easier maintenance.

COOLING CIRCUIT

Comprises: fluid valve, feeding plug, fluid sight glass, dehydrating filter, thermostatic expansion valve for pressure external control, high and low pressure switches and safety valve.

Technical information manual ZETA-ECHOS

REF. ZETA-ECHOS-10210000602_09.10/ZETA_ECHOS_2011.DOC

TECHNICAL CHARACTERISTICS

ELECTRICAL PANEL

The panel consists of:

- Main disconnect switch;
- Fuses for main and auxilliary power circuit protection ;
- Magnetothermic switches, pumps (if present);
- Compressor remote switches;
- Fan remote switches ;
- Pump remote switches (for ST version)
- Microprocessor to control the following functions:
 - Control of ingoing water temperature;
 - Anti-freeze protection;
 - Compressor operation timers;
 - Automatic rotation of compressor start-up sequence;
 - Alarm signals;
 - Alarm reset;
 - Capacity steps;
 - Cumulative alarm contact for remote signaling;
 - Forced capacity reduction according to pressure limits;
- Display of:
 - Ingoing and outgoing water temperature;
 - Currently set temperature and differential;
 - Alarm description;
 - Hour counter for compressor operation;
- black box function;
- Power supply [V/f/Hz]: 400/3~/50 ±5%.

CONTROL AND SAFETY DEVICES

- cooled water temperature control probe (on evaporator intake);
- anti-freeze probe on evaporator outtake;
- manual reset high pressure controller;
- controlled manual reset low pressure switch;
- high pressure safety valve;
- compressor overtemperature protection;
- fan overtemperature protection;
- vane actuated mechanical flow switch (supplied as standard)

TESTING

The units are factory-tested and supplied complete with oil and refrigerant.

Technical information manual ZETA-ECHOS

VERSIONS

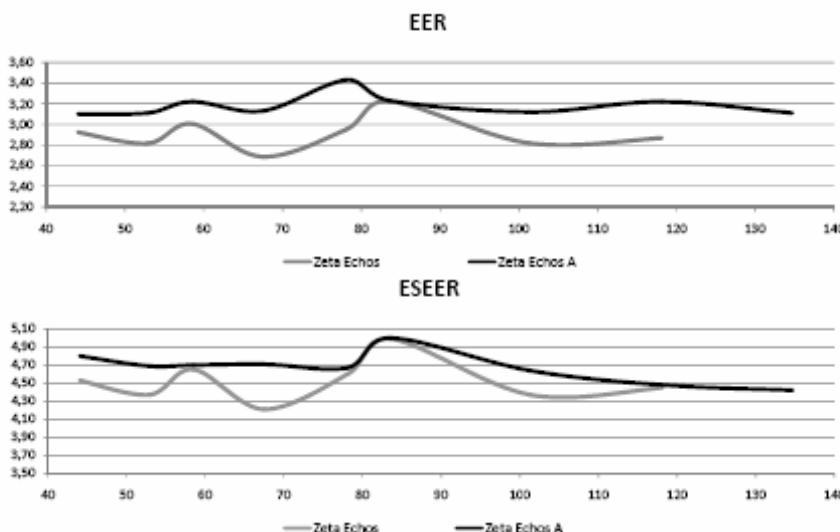

Check the table with the available configurations for any interferences between one option and the other.

ZETA ECHOS A:

high performance unit

Zeta Echos Class A carries the hallmark of energy-saving thanks to an EER of the chiller operation always greater than

3.1! There are 9 sizes available, with a capacity range from 44 to 135 kW, classified in full compliance with the regulations set by EUROVENT as high energy efficiency class. The diagram below describes the increase of energy efficiency of the Zeta Echos range, at 100% charge (EER) and partial charge (ESEER), according to the EUROVENT provisions.

ZETA ECHOS /HP:

reversible heat pump

Beside the basic version components, the unit comprises:

- 4-way reversing valve;
- fluid collector;
- a second thermostatic valve;
- solenoid valve on fluid line from 6.2 at 13.2;
- enablement of summer/winter mode switching and automatic defrosting via microprocessor, with a Blue Box patented logic, which ensures optimal activation and duration of defrosting operations.

ZETA ECHOS /LE:

motocondensing unit

In addition to the basic version, this unit has no evaporator and thermostatic valve fitted.. The fluid receptors can be supplied as accessories. The solenoid valve on the fluid line is supplied as standard. The unit is supplied without refrigerant charge.

ZETA ECHOS /LE /HP:

heat pump motocondensing unit

In addition to the basic version ZETA ECHOS/HP, this unit has no evaporator and thermostatic valves fitted. The solenoid valve on the fluid line is supplied as standard. The unit is supplied without refrigerant charge.

Technical information manual ZETA-ECHOS

REF. ZETA-ECHOS-10210000602_09.10/ZETA_ECHOS_2011.DOC

VERSIONS

HYDRAULIC SYSTEM OPTIONS

ZETA ECHOS /ST 2PS

unit with pumps and tank

Beside the basic version components, the unit comprises:

- insulated storage tank;
- two circulation pumps of which one in stand-by mode, with automatic switch in case of failure;
- expansion vessel;
- check valve;
- gate valves.

The ST version is available in four additional configurations:

- ST 1PS: unit with pump and tank;
- ST 1P: unit with single pump without tank;
- ST 2P: with 2 pumps without tanks;
- ST S: with tank without pumps.

ACCESSORY VERSIONS

ZETA ECHOS /DC

unit with recovery condenser

Beside the basic version components, the unit comprises a recovery condenser on each cooling circuit (recovering 100% of the condensing heat for the production of hot water) and a fluid receptor. The condenser is brazed plate type. The accessory is available for sizes from 3.2-13.2 "1p-2p" and for all models without hydraulic module; is not available for the HP models. The control automatically enables the recovery function, depending on water temperature, and controls its safety desablement in case of high pressure. For maximum benefit use the accessory combined with the circuit regulator. The accessory is available for all models. It is not available for the HP version.

ZETA ECHOS /DS

unit with desuperheater

Beside the basic version components, the unit comprises a brazed plate recovery condenser on each cooling circuit (recovering 20 % of the condensate, connected in series with the condenser coil). The accessory is available for models from 3.2 to 13.2 with "1P-2P" and for all models without hydraulic module. For maximum benefit use the accessory combined with the circuit regulator. This version is also available for HP outfit. In this case, the system must be equipped with a shut-off valve on the water recovery line during the HP mode operation, as shown in the manual.

ZETA ECHOS /LN

low-noise unit

In addition to the basic version components, this unit has a fully soundproofed compressor compartment (using high acoustic impedance and sound-absorbent materials).

ZETA ECHOS /SLN

super low-noise unit

beside the /LN version components, the coil surface is larger, fans have reduced speed and a turn regulator.

Technical information manual ZETA-ECHOS

REF. ZETA-ECHOS-10210000602_09.10/ZETA_ECHOS_2011.DOC

ACCESSORIES

REFRIGERANT CIRCUIT ACCESSORIES

- Electronic thermostatic valve;
- Condensing pressure controlled by operation circuit regulator with low external temperatures;
- Double set point (high/low temperature) with a single electronic expansion valve. The evaporator is sized according to high temperature operation. The set point can be changed from the keyboard or the digital input, in this case must be specified in the order;
- High and low pressure switches are available for all models;
- Fluid receptors (supplied as standard for HP, HP/LE and DC, DC/LE versions);
- Intake and delivery valves on compressor line;
- Solenoid valve on fluid line (supplied as standard for HP and HP/LE and LE versions);
- Low water temperature kit.

HYDRAULIC CIRCUIT ACCESSORIES

- Defroster for the evaporator (the ST version is equipped with an antifreeze resistance on the tank, piping system and on the pump spiral, which is insulated for this reason) and on any recovery heat exchanger;
- Water side safety valve (ST version only). The valve calibration value is 6 bar, which corresponds to the maximum allowed operating pressure.

ELECTRICAL ACCESSORIES

- Serial interface RS485 suited for Carel and Modbus protocols;
- Power factor correction $\cos f \geq 0.9$ under nominal operating conditions; on the external board in IP 55 (power supply connected by the installer directly on the main). The accessory is combined with dry contacts;
- Remote user terminal (in addition to the standard one);
- Dry contacts.

MISCELLANEOUS ACCESSORIES

- Rubber antivibration mounts;
- Copper/copper condensation coil;
- Copper/tinned-copper condensation coil;
- Preprinted aluminium condensation coil;
- Condensation coil with passivated aluminium and polyurethane coating.
The treatment consists of a double layer, the first of which passivates the aluminium and acts as a primer and the second which is a polyurethanebased surface coating. The product has high anti-corrosive properties and virtually resists to all environmental conditions. For installation in marine and rural environments, from industrial to urban areas;
- Packaging in wooden crates;
- Special pallet/skid for container shipment;
- Non-standard "RAL" paint colours.

Fan nominal power		n° x kW	3 x 0,6	3 x 0,6	3 x 0,6	2 x 2,0	2 x 2,0
Fan nominal current		n° x A	3 x 3,0	3 x 3,0	3 x 3,0	2 x 4,0	2 x 4,0
Pump motor nominal power		kW	1,5	1,5	1,5	2,2	2,2
Pump motor nominal current		A	3,49	3,49	3,49	4,78	4,78
Main power supply		V/ph/Hz			400/3N~/50		
Auxilliary power supply		V/ph/Hz			230/1~/50 ±5%		

(1) Electrical power that must be supplied by the mains to power the unit.

(2) Internal breakers tripping current. This value is never exceeded and must be used to size the line and its protections (refer to the electric diagram supplied with the unit).

(3) The values in brackets refer to the ST version unit (with storage tank and pumps or units with pumps only).

(4) Maximum input current calculated considering the power of the compressor with the higher power and the maximum current absorbed by all other devices

INSTALLATION GUIDELINES

POSITIONING

- Strictly comply with the clearance areas indicated in the catalogue.
- Make sure that there are no obstructions near the finned coil suction or the fan air discharge.
- Place the unit in a manner that assures the lowest environmental impact (noise, integration with nearby structures, etc.).

WIRING

- Always consult the enclosed wiring diagram, which provides all the instructions required for making the electrical connections.
- Power up the unit (closing the disconnect switch), at least 12 hours before start-up, in order to turn the crankcase heaters on. Do not switch the power off during short stoppages.
- Before turning on the disconnect switch, stop the unit by turning off all the operating switches or using the remote control.
- Before accessing the inner components, cut the power off by turning on the disconnect switch.
- The power supply must be fitted with all protections according to the standards in force.
- Electrical connections: three-pole power cable + earth, or three pole cable + neutral + earth; external interlock; remote alarm signalling..

HYDRAULIC CONNECTIONS

- Carefully vent the hydraulic system with the pump switched off, by turning the air valve. This procedure is particularly important, as even small air bubbles may cause the evaporator to freeze.
- Drain the system during winter stops or use special anti-freeze solutions. During short stops, it is advisable to install an electric heater (defroster) on the evaporator and the hydraulic circuit.
- Install the hydraulic circuit with all the components shown in the diagrams (expansion vessel, flow switch, storage tank, air valve, shut-off valves, flexible connections, etc. Please refer to the user, installation and maintenance manual).
- Connect the flow switch when supplied in the kit, following carefully the instructions provided with the units.

START-UP AND MAINTENANCE

- Strictly follow the instructions given in the use and maintenance manual. These operations must be carried out by qualified personnel only.
